ECO DECT ENERGY SAVING

CORDLESS HOME COMMUNICATION Gigaset

Committed to quality

With our **tradition of high quality**, we feel responsible for giving our customers only the best products – time and time again. That's why all our Siemens* Gigaset telephones are thoroughly tested before leaving the factory. So we can sincerely say: no matter which model you choose, you'll be able to **trust the reliability** and enjoy the benefits of your phone for years and years.

Extensive functionality, robustness, and resistance tests ensure we keep our promise to deliver quality. Know you can count on your Siemens Gigaset.

Leader in technology

Today we're constantly striving to be ready for tomorrow's communication needs. Always one step ahead, the complete range of Siemens Gigaset telephones uses groundbreaking technology. We integrate **user-friendly, high-tech features** in your home phone, such as Bluetooth®, innovative sound technology like HDSP™ and HSP™, and intuitive user interfaces. Whichever Gigaset is your favourite, you can be confident it has been manufactured according to the highest standards – quality **made in Germany**.

Designed by inspiration

High-class materials, **trend-setting styles** and ergonomic shapes – Siemens Gigaset telephones always integrate the latest in form and function into their designs. And the multiple **prizes for outstanding design** awarded to Siemens Gigaset over the years prove this. But more importantly: whatever your individual needs, our models are specially designed for you, so you always get the most out of your calls.

Protecting the earth

Currently it's a trend to be environmentally friendly. But at Siemens Gigaset our focus on the environment is here long-term – it's deeply rooted, consistent and progressive. We promise to uphold the strict standards specified in the ISO14001 guidelines for environmental management. Simply stated, **our concerns about the environment** run as deeply as yours do.

Our ECO DECT phones have an energy-saving power supply which uses **up to 60% less energy**[1] – saving you money and helping the environment. Like all Gigaset cordless phones, our ECO DECT models variably reduce transmitting power from the handset to base station depending on their distance apart. You can reduce the transmitting power of the base station by 80%[2] simply by choosing **ECO Mode**. Furthermore, ECO Mode Plus[3], with its Zero Transmission Mode, slashes the transmitting power by 100% when the handset is idle or charging. Enjoy a more energy-efficient way of staying connected with your family and friends.

1) Compared to conventional Gigaset base stations
2) For all registered handsets – in comparison to when ECO Mode is not activated and to our conventional cordless phones
3) For all registered handsets and when all support ECO Mode Plus

SIEMENS

High Sound Performance™ is a new Gigaset technology that provides brilliant sound. With this integrated Gigaset innovation, telephoning has become a new experience – and has never sounded so clear.

High Definition Sound Performance™ is a new Gigaset innovation that uses wideband audio technology to let you talk in twice the sound quality of a normal call.

Integrated Bluetooth® capability which allows you to synchronize data with your PC quickly and easily.

Thanks to an energy-saving power supply, ECO DECT phones use up to 60% less energy than our conventional cordless phones. Like all Gigaset cordless phones, ECO DECT models also variably reduce transmitting power from the handset to base station according to their distance apart – but go further in a number of other ways.

Choosing ECO Mode on selected models reduces the base station's transmission power by 80%[1]. When docked[2], some ECO DECT phones also reduce the transmitting power of both handset and base station to almost zero.

[1] In comparison with when ECO Mode is not activated and our conventional cordless phones. Available for all registered handsets.
[2] With only 1 registered handset.
